

Just a reminder, as stated on our website and in our online listing, unfortunately, the machine will NOT work with tap water and may automatically go into a self-clean mode (blue LED light flashing) if tap water or filtered water from your refrigerator are used.

**Making ice for the 1<sup>st</sup> time. IMPORTANT**

- Unplug the machine.
- Remove the reservoir door and fill the machine by sight to the max fill line located on the back of the water reservoir.
- Replace the cover and plug the unit into power.
- Press the Make Nuggets button once and wait for the Making Ice LED to flash slowly.

**Cleaning the machine.**

- Every 3-4 weeks, you must use the auto-cleaning program with a [solution](#).

**The SOLUTION.**

- We recommend using 4-5 tablespoons of citric acid (best) or 1 cup of distilled white vinegar.

**Questions, Returns, or Suggestions, don't hesitate to get in touch with us directly.**
